(54) FRONT FRAME OF GLASSES

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a front frame of glasses allowed to be variously designed by changing the outer shapes of rims while using lenses of the same shape without using conventional rim lines.

SOLUTION: Each rim 1 is prepared by punching a plate material. Thereby the dimensions and shapes of inner and outer peripheries 5, 6 of the rim 1 are made different, a notch 7 is formed at least on one position of the rim 1 and a rim lock is formed on the rear of the notch part 7. On the position of the rim lock, the rim 1 is opened, both rims 1 are connected by a bridge 2, an armor 3 is brazed on the outside of the rim 1, and a temple is connected to the armor 3 so as to be folded.
